

Post Entry Facility: Analytica Laboratories Ltd
Post Entry Type: Transitional Facility
ATF Code: 19087
Address: 10 Ruakura Research Centre Bisley Road Enderley Hamilton
Operator Name: Analytica Laboratories Limited

Special Conditions : You must comply with the import health standard/s listed on this permit and any special conditions recorded below:
IHSs can be viewed via the MPI website:
<https://www.mpi.govt.nz/legal/compliance-requirements/ihs-import-health-standards/>

Commodities imported under this permit can only be used for analysis that does not require viable samples - BIOLOGIC.ALL does not permit microorganism enrichment, isolation, or culture / enumeration.

The activities being undertaken must be covered with the scope of the facility's MPI-approved quality management system / operating manual.

The areas of the transitional facility where any invertebrate samples or products are exposed or likely to be exposed must be insect proof as approved by MPI in the transitional facility's operating manual.

Once evaluation is complete, the remaining samples, all residues and wrapping materials must be destroyed as per the facility's approved operating manual or by incineration at the transitional facility approved by MPI for that purpose.

ANIMAL SAMPLES

Pursuant to section 27(1)(d)(iii) of the Biosecurity Act 1993, Chief Technical Officer (CTO) direction 2023 082 [G] allows the following equivalence for animal samples and specimens for analysis under BIOLOGIC.ALL:

Animal samples imported for analysis, regardless of the animal's health status, can be imported as long as the following requirements are met:

1. The samples must be imported on an MPI import permit which directs them to a transitional facility approved to 154.02.17; and
2. The purpose of the import is for evaluation and destruction unless permission has been granted by MPI (in writing) for sample retention; and
3. The samples must be for analysis that does not require viable samples; and
4. The activities being undertaken on the samples must be covered in the scope of the facility's MPI-approved quality management system / operating manual.
5. The areas of the transitional facility where any invertebrate samples are analysed must be insect proof as per the facility's MPI-approved quality management system / operating manual.
